DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (page 7, last paragraph), filed 5/19/2005, with respect to claims 1-28 have been fully considered and are persuasive. The rejection of claims 1-28 has been withdrawn.

Allowable Subject Matter

2. Claims 1-28 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention provides a new method and device for storing and displaying image data, with an easy way to undo changes in the image area and return to the original image without losses in quality or information content (see specification, page 6, lines 15-17).

Particularly, the new method and device comprise the following features, which the prior art taken either singly or in combination does not teach:

- adjusting the size of the image area of an image to be displayed by selecting at least one image data block and displaying the image with adjusted image area based on image data included in the decompressed at least one selected image data block (see independent claim 1);

- wherein the selection means are adapted to adjust the boundary of the image to be displayed by means of selecting appropriate image data blocks (see independent claim 18).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
